Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 09 January 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **12 November 2018**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

[1] Figures were extracted from Departmental systems **on 8 January 2019**. As data has been drawn from a live systems environment, the figures provided may differ slightly in previous or future reporting. Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

[2] Figure includes General field actions and Employer Awareness visits.

[3] Some non-citizens may have been located more than once in any given program year. Each location event is counted.

[4] Employer Awareness activities includes field visits and administrative actions - Employer awareness field visits are also included as part of 'Field Actions - Visited/Executed'.

[5] This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected

[6] The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled, and the cancellation is subsequently revoked or set aside (this may occur for a number of reasons, including further legal proceedings, and administrative or jurisdictional errors, etc.), and then the visa is cancelled again. Duplicates may also exist.

[7] s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This includes s501F visa cancellations.

[8] This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.

[9] Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of Unlawful Non-Citizens and numbers are provided as an estimate only. Numbers are rounded which can result in rounding errors.

[10] Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.

[11] Figures include IMA returns from the community.

[12] Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 16 January 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 January 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

[1] Figures were extracted from Departmental systems **on 8 January 2019**. As data has been drawn from a live systems environment, the figures provided may differ slightly in previous or future reporting. Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

[2] Figure includes General field actions and Employer Awareness visits.

[3] Some non-citizens may have been located more than once in any given program year. Each location event is counted.

[4] Employer Awareness activities includes field visits and administrative actions - Employer awareness field visits are also included as part of 'Field Actions - Visited/Executed'.

[5] This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected

[6] The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled, and the cancellation is subsequently revoked or set aside (this may occur for a number of reasons, including further legal proceedings, and administrative or jurisdictional errors, etc.), and then the visa is cancelled again. Duplicates may also exist.

[7] s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This includes s501F visa cancellations.

[8] This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.

[9] Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of Unlawful Non-Citizens and numbers are provided as an estimate only. Numbers are rounded which can result in rounding errors.

[10] Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.

[11] Figures include IMA returns from the community.

[12] Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 23 January 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 January 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

[1] Figures were extracted from Departmental systems **on 8 January 2019**. As data has been drawn from a live systems environment, the figures provided may differ slightly in previous or future reporting. Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

[2] Figure includes General field actions and Employer Awareness visits.

[3] Some non-citizens may have been located more than once in any given program year. Each location event is counted.

[4] Employer Awareness activities includes field visits and administrative actions - Employer awareness field visits are also included as part of 'Field Actions - Visited/Executed'.

[5] This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected

[6] The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled, and the cancellation is subsequently revoked or set aside (this may occur for a number of reasons, including further legal proceedings, and administrative or jurisdictional errors, etc.), and then the visa is cancelled again. Duplicates may also exist.

[7] s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This includes s501F visa cancellations.

[8] This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.

[9] Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of Unlawful Non-Citizens and numbers are provided as an estimate only. Numbers are rounded which can result in rounding errors.

[10] Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.

[11] Figures include IMA returns from the community.

[12] Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 30 January 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 January 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

[1] Figures were extracted from Departmental systems **on 8 January 2019**. As data has been drawn from a live systems environment, the figures provided may differ slightly in previous or future reporting. Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

[2] Figure includes General field actions and Employer Awareness visits.

[3] Some non-citizens may have been located more than once in any given program year. Each location event is counted.

[4] Employer Awareness activities includes field visits and administrative actions - Employer awareness field visits are also included as part of 'Field Actions - Visited/Executed'.

[5] This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected

[6] The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled, and the cancellation is subsequently revoked or set aside (this may occur for a number of reasons, including further legal proceedings, and administrative or jurisdictional errors, etc.), and then the visa is cancelled again. Duplicates may also exist.

[7] s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This includes s501F visa cancellations.

[8] This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.

[9] Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of Unlawful Non-Citizens and numbers are provided as an estimate only. Numbers are rounded which can result in rounding errors.

[10] Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.

[11] Figures include IMA returns from the community.

[12] Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

**s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 06 February 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 January 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

[1] Figures were extracted from Departmental systems **on 8 January 2019**. As data has been drawn from a live systems environment, the figures provided may differ slightly in previous or future reporting. Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

[2] Figure includes General field actions and Employer Awareness visits.

[3] Some non-citizens may have been located more than once in any given program year. Each location event is counted.

[4] Employer Awareness activities includes field visits and administrative actions - Employer awareness field visits are also included as part of 'Field Actions - Visited/Executed'.

[5] This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected

[6] The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled, and the cancellation is subsequently revoked or set aside (this may occur for a number of reasons, including further legal proceedings, and administrative or jurisdictional errors, etc.), and then the visa is cancelled again. Duplicates may also exist.

[7] s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This includes s501F visa cancellations.

[8] This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.

[9] Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of Unlawful Non-Citizens and numbers are provided as an estimate only. Numbers are rounded which can result in rounding errors.

[10] Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.

[11] Figures include IMA returns from the community.

[12] Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).

^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 13 February 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **5 February 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **05 February 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 February 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

.

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).

^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 27 February 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **5 February 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **05 February 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 February 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics are correct as at COB 06 March 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **5 February 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **05 February 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 February 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics are correct as at COB 13 March 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **7 March 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 March 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 March 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics are correct as at COB 20 March 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **7 March 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 March 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 March 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 27 March 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **7 March 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 March 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 March 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **7 March 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 March 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **14 March 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

**s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 10 April 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 April 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 April 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **11 April 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 17 April 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 April 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 April 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **11 April 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 24 April 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 April 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 April 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **11 April 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Weekly statistics are correct as at COB 01 May 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **8 April 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 April 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **11 April 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

[1] Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **7 May 2019**.

[2] Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 May 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **07 May 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

*s47E(d)

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).

^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics are correct as at COB 15 May 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to UMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on UMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at 7 May 2019.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 May 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **07 May 2019**.
8 This figure excludes UMAs, UMA crew, UMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No UMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include UMA returns from the community.
12 Figures include UMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics as at COB 22 May 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.
[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.
[3] All figures within this report are based on DIBP operational data.
[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.
[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at 7 May 2019.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 May 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **07 May 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 29 May 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at 7 May 2019.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 May 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **07 May 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 05 June 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at 7 May 2019.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 May 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **07 May 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 12 June 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at 7 May 2019.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

Removals from Detention[12]	6,948	7,083	135	6,584	5,090	(1,494)

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 Jun 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **03 Jun 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 19 June 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **07 Jun 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 Jun 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **03 Jun 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 26 June 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **07 Jun 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 Jun 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **03 Jun 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 03 July 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **07 Jun 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 Jun 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **03 Jun 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

** Preliminary detections are based on indicative uncleansed data which may be subject to further revision. The figures may not fully reflect detections by the ABF across illicit goods classes as the Department does not currently report on pre or post-border detections.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 10 July 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **07 Jun 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Includes IMAs who are 'in the review window' where relevant.
2 Includes protection outcomes since 19 September 2013.
3 Excluded Fast Track represents IMAs at various stages of processing who have been excluded from merits review.
4 Excludes a small number of IMAs on Temporary Humanitarian Stay (subclass 449) or Temporary Humanitarian Concern (subclass 786) visas who have not yet lodged, are currently in the process or have already been finally determined. Figures exclude certain cohorts of IMAs that do not form part of the IMA Legacy Caseload.
5 BVE in community includes IMAs who previously held a BVE and are now undergoing a re-grant process.
6 Includes IMAs who are in correctional facilities.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **07 Jun 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **03 Jun 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 17 July 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **09 Jul 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **09 Jul 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **09 Jul 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

*s47E(d)

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).

^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 24 July 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **09 Jul 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **09 Jul 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **09 Jul 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 31 July 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from DIBP systems as at **09 Jul 2019**.
2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.
Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **09 Jul 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **09 Jul 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics as at COB 07 August 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **09 Jul 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **09 Jul 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **09 Jul 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Value ($m)	17.03	16.31	(0.72)	16.31	14.06	(2.25)

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics as at COB 14 August 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	125	1	39	165

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 52 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **08 Aug 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 Aug 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **08 Aug 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics as at COB 21 August 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **08 Aug 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 Aug 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **08 Aug 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 28 August 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	136	1	46	183

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **08 Aug 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 Aug 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **08 Aug 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 04 September 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	138	1	47	186

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **08 Aug 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **08 Aug 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **08 Aug 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 11 September 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Sep 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Sep 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **13 Sep 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 18 September 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	144	0	49	193

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Sep 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Sep 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **13 Sep 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Weekly statistics as at COB 25 September 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Sep 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Sep 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **13 Sep 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 02 October 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	145	0	52	197

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Sep 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Sep 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **13 Sep 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 09 October 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	149	0	52	201

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Sep 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Sep 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **13 Sep 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 16 October 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	149	0	52	201

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Oct 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Oct 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **9 Oct 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 23 October 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	151	0	53	204

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Oct 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Oct 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **9 Oct 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 30 October 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	152	0	53	205

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Oct 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Oct 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **9 Oct 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

s47E(d)

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 06 November 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	155	0	53	208

[1] Includes settled refugees who have subsequently returned to the ELRTC voluntarily.

[2] Includes settled refugees who have subsequently returned to the West Lorengau Haus voluntarily.

[3] Includes persons actively pursuing Assisted Voluntary Returns and involuntary removal case(s) managed by PNG ICSA.

[4] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

[5] Refers to Failed Asylum Seeker(s) who are residing in the PNG community after being discharged from service provider's care due to long-term absence from allocated accommodation.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Oct 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Oct 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **9 Oct 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 13 November 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	179	0	55	234

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Nov 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Nov 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **8 Nov 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).
^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.
Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 20 November 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	185	0	59	244

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Nov 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Nov 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **8 Nov 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

** Equivalent weight represents the total weight of loose leaf tobacco detections together with the total weight of cigarette sticks (calculated using an average weight per stick).

^ The number of detections may be more than stated due to current recording practices. For example, one detection could be a 'bin' or a 'pallet' etc.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Home Affairs Weekly Statistics

Weekly statistics as at COB 27 November 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Total in PNG	**193**	**0**	**20**	**213**
Australia (Medical)	185	0	59	244

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Nov 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Nov 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **8 Nov 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

*** Preliminary detections are based on indicative uncleansed data which may be subject to further revision. The figures may not fully reflect detections by the ABF across illicit goods classes as the Department does not currently report on pre or post-border detections.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

Home Affairs Weekly Statistics

Weekly statistics as at COB 04 December 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

Australia (Medical)	186	0	62	248

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **8 Nov 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **8 Nov 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **8 Nov 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

* A detection relates to the number of items actually detected. This information is sourced from transactional systems. Undeclared conventional firearms, parts and accessories detections are 'undeclared detections' not 'seizures'. An imported firearm is considered an 'undeclared detection' when it has been detected and identified by the ABF as a prohibited or restricted firearm and where it has not been declared to the ABF in accordance with the import requirements.

** The term 'conventional' firearms excludes firearm categories such as imitations, airguns, BB guns and paintball guns but includes all other firearms.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

Home Affairs Weekly Statistics

Weekly statistics as at COB 11 December 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

PNG Settlement	40	0	0	40
Total in PNG	**191**	**0**	**17**	**208**
Australia (Medical)	186	0	62	248

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Dec 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Dec 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **8 Nov 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

Home Affairs Weekly Statistics

Weekly statistics as at COB 18 December 2019 unless specified

Overview

The Home Affairs Weekly Statistics is produced by the Data Division of the Department of Home Affairs.

The intention of the report is to provide a regular snapshot of metrics and trends covering certain key aspects of the Department. The report will also highlight emerging or prominent issues.

The report is developed in consultation with program owners across the Department. Any clarification on figures within the report can be provided directly by the relevant business area.

The content of the report has been produced specifically for the Minister's Office. All other parties who wish to republish the statistics or commentary contained in this document must seek permission from the relevant business areas. Requests for additional statistics should also be directed at the relevant business areas. The Data Division can assist in facilitating these requests.

PNG Settlement	36	0	0	36
Total in PNG	**179**	**0**	**17**	**196**
Australia (Medical)	192	0	62	254

[1] Includes refugees attending US resettlement appointments or awaiting departure to the US. Also includes refugees progressing their own third country resettlement. Not all refugees in this cohort are necessarily on a departure pathway.

Note: Does not include 53 Failed Asylum Seekers currently detained by the Immigration and Citizenship Authority (ICA). The policy position between Home Affairs and ICA is that once a failed asylum seeker in PNG is detained by ICA then they are no longer considered part of the Regional Resettlement Arrangement (RRA)

[1] Immigration detention centres operate in a dynamic environment. It can take several days for action taken on the ground to be reflected in DIBP systems. All figures are subject to change on a daily basis.

[2] Capacity information can change depending on the configuration of accommodation and the cohorts within a facility.

[3] All figures within this report are based on DIBP operational data.

[4] Some children may be reported in an IDC as recorded in DIBP systems, although they are technically accommodated in an APOD.

[5] This field represents the expected occupancy rate (determined by the Department) for the current month. The contract provides sufficient bandwidth to cover all facilities at their maximum 'contingency capacity' utilisation.

1 Please note that reporting in relation to IMA assisted or managed departures (including returns from the community and removals from immigration detention) has changed. As part of its program of statistical improvement, the Department has automated its production of statistics on IMA returns/removals. The transition has resulted in a change to the previously reported figures. The reported figures were extracted from Departmental systems as at **10 Dec 2019**.

2 Third country settlement includes refugees settled in Cambodia, Canada and the United States of America.

Note that the historical figures for previous financial years have been refreshed and updated at the commencement of the current program year. As a result, due to retrospective data entries or systems corrections; and recent improvement to methodologies in the extraction of system data, the figures will differ from those previously reported.

Key Observations

Rapid Departure Assistance service (RDA)

The Rapid Departure Assistance service, delivered by the International Organisation for Migration as part of their existing returns services, is only available to transferees in the Regional Processing Centres and was implemented on 30 May 2014. This service provides an increased amount of financial assistance for individuals, compared to the assistance available to those returning from an onshore location. The increased costs associated with the implementation of RDA offshore accounts for the increase in costs across the program, despite a drop in the number of comparative returns from Manus Island and Nauru. Allowances are provided on a GDP per capita, country-specific basis and consist of cash and in-kind assistance.

Voluntary Departure Assistance service (VDA)

The Voluntary Departure Assistance service is only available to transferees in the Regional Processing Centres, and was implemented on 11 July 2014. This is a departmental service and facilitates departure for those transferees who wish to return home, but who the International Organization for Migration are unable to assist. Voluntary Departure Assistance allowances are cash allowances only and are structured on a GDP per capita, country-specific basis. Therefore, the amount of assistance provided through VDA is less than that which is offered under RDA due to the unavailability of in-kind assistance.

1 Figures for 2018-19 (Jul-Jan) were extracted from Departmental systems on **10 Dec 2019**. As data has been drawn from a dynamic source, any historical figures provided may differ slightly in previous or future reporting.
2 Figure includes General field actions and Employer Awareness visits. Field Operations activity has focussed on higher threat targets in 2017-18, including businesses and individuals who pose a significant risk to the Australian community. While this has resulted in a slight reduction in overall activity, Field Operations in 2018-19 will continue to focus activity according to the ABF Priorities.
3 Some non-citizens may have been located more than once in any given program year. Each location event is counted.
4 Employer Awareness activities includes field visits and administrative actions - Employer awareness activity statistics are also included as part of 'Field Actions – visited/executed'
5 This does not include all persons entering the SR Population as there are other factors and cohorts that lead into the SR Population aren't reflected
6 The figures include all onshore/offshore visa cancellations. A visa may be recorded as cancelled more than once: An example of a visa being recorded as cancelled more than once is if the visa is cancelled and the cancellation is subsequently revoked or set aside, and then the visa is cancelled again. A cancellation may be revoked or set aside for a number of reasons; including, further legal proceedings and administrative or jurisdictional errors. Duplicates may also exist.
7 s501 visa cancellation statistics have been derived from corporate frozen data and may not match other operational or live reporting. This excludes s501F visa cancellations. These figures have been provided by Complex & Controversial Cases section and was extracted on **10 Dec 2019**.
8 This figure excludes IMAs, IMA crew, IMA BVEs, Illegal Foreign Fishers and other unauthorised arrivals.
9 Due to data availability this figure can only be provided yearly. There are known errors in the Estimate of UNC and numbers provided are an estimate only and are rounded. The Estimate of UNC is reported annually. No IMA are included in the UNC data
10 Please note that SRS reporting in relation to assisted/managed departures and resolutions populations has changed, due to recently implemented improvements to methodologies for producing these datasets. As a result, historical figures will differ from those previously reported. Figures in this table account for onshore assisted/managed departure only and does not include departures of non-citizens from Offshore Processing Centres.
11 Figures include IMA returns from the community.
12 Figures include IMAs, illegal foreign fishers (IFFs) and border turnarounds (sea and air arrivals who were not immigration cleared).

* A detection may be determined from either confirmatory or presumptive tests. This information is sourced from transactional systems.

[a] Precursor detections refer to detections of chemical substances that are prohibited imports / exports that may be used in the manufacture of illicit drugs. Some precursors detected were likely not intended for the manufacture of illicit drugs but were active ingredients in health supplements, cold and flu preparations, herbal medicines and weight-loss products purchased on the internet.

[b] ATS detections include methamphetamine and amphetamine but excludes MDMA (ecstasy).

[c] PIED detections include steroids, DHEA (dehydroepiandrosterone / prasterone) and hormones.

[d] On 5 September 2015, legislation amendments came into force which allows Border Force officers to search for and seize New Psychoactive Substances (NPS) and Substances Represented as Serious Drug Alternatives (SDA).

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.

* Detections of undeclared currency do not include instances of detections under $10,000; fines issued as well as where no value amounts have been recorded. This information is sourced from transactional systems. The value of detections include all monies on a person such as pockets, wallet, carry-on bags, envelopes and checked-in bags. All foregin currencies are converted to AUD. All amounts are totalled and recorded.

Note: Data is taken from live systems and may vary from previously reported figures. Data is typically available 1 month after the end of each reporting period.
