Note 1: What is a percentile? A percentile is a measure used in statistics indicating the value below which a given percentage of observations in a group of observations falls. For instance, processing times as at the 75th percentile means that 75 per cent of applications finalised globally were finalised in the stated time or earlier.

Note 2: Processing times for some visas are not available where the number of visa decisions is too few in a particular month to provide a reliable indicator of time. Where possible, the Department has started to apply a year to date (YTD) count of visa decisions, rather than monthly, in an attempt to provide an indicative view of the global processing time.

Note 3: The Department has global workload management arrangements for the processing of partner visa applications, and caseloads may be transferred between offices for operational reasons.

Note 4: As data is drawn from a dynamic system environment, the information is correct at the time of clearance and figures may differ slightly from previous or future reporting.

Note 1: What is a percentile? A percentile is a measure used in statistics indicating the value below which a given percentage of observations in a group of observations falls. For instance, processing times as at the 75th percentile means that 75 per cent of applications finalised globally were finalised in the stated time or earlier.

Note 2: Processing times for some visas are not available where the number of visa decisions is too few in a particular month to provide a reliable indicator of time. Where possible, the Department has started to apply a year to date (YTD) count of visa decisions, rather than monthly, in an attempt to provide an indicative view of the global processing time.

Note 3: The Department has global workload management arrangements for the processing of partner visa applications, and caseloads may be transferred between offices for operational reasons.

Note 4: As data is drawn from a dynamic system environment, the information is correct at the time of clearance and figures may differ slightly from previous or future reporting.
