Introducing the Cyber Health Check Tool

The Australian Government has developed a Cyber Health Check Tool designed for small businesses, not-for-profit organisations and individuals.

PRIORITISING CYBER SECURITY

- All Australians have the right to be **secure online**
- **47%** of Australians experienced at least one form of **cybercrime** in 2024
- Cyber incidents are projected to cost Australian businesses more than **\$150 billion** over the next 10 years

ABOUT THE TOOL

- ✓ The Cyber Health Check is a **free** and **fast** 5 minute self-assessment made up of easy to understand questions to measure your cyber awareness.
- ✓ The tool provides you with a **tailored action plan** with customised advice to improve your cyber security.
- ✓ The tool will be hosted on **www.cyber.gov.au**

BENEFITS OF USING THE TOOL

By identifying areas for improvement, this tool helps Australian organisations and the community take simple steps to **strengthen** their defences and become more resilient to cyber incidents by:

- ✓ **Protecting personal information**
- ✓ **Maintaining system and device security**
- ✓ **Identifying and preventing scams**
- ✓ **Managing access to devices and accounts**

UNDERSTANDING YOUR RESULTS

Your customised tailored action plan includes:

- Your health check **score** and rating
- Suggestions on what to **prioritise now** and improvements to make in the **future** to your cyber security.

To access the **Cyber Health Check Tool**, visit: www.cyber.gov.au/cyberhealthcheck
