APPLICATION FOR A TARIFF CONCESSION ORDER (TCO)

Please read the form carefully before completing.

- 1 Section 269F of the *Customs Act 1901* requires a TCO application to be in an "approved form", contain such information as the form requires, and be signed in the manner indicated in the form. **THIS IS THE APPROVED FORM FOR THE PURPOSES OF THAT SECTION. EVERY QUESTION MUST BE ANSWERED.**
- 2 **Applicant's obligation** - Section 269FA of the *Customs Act 1901* sets out the responsibility of an applicant for a TCO to establish to the satisfaction of the Chief Executive Officer (CEO), that on the basis of:
 - (a) all information that the applicant has, or can be reasonably expected to have; and
 - (b) all inquiries that the applicant has made, or can reasonably be expected to make; there are reasonable grounds for asserting that the application meets the core criteria.
- 3 Failure to supply the information required by this form will result in rejection of the application and consequential loss of operative date.
- 4 Where there is insufficient space, answers may be provided by attachment, which should clearly identify the question to which the attachment relates.
- 5 The identity of the applicant and of the importer for whom the applicant is acting will be published in the Gazette.
- 6 An application will be date stamped on the day it is first received in Canberra by an officer of Customs in accordance with the instructions specified at the end of this form. Any resultant TCO comes into force **ON THAT DAY**.
- 7 All information about inquiries into the production of substitutable goods must relate to the date this application is lodged with Customs.
- 8 Further information on the Tariff Concession System is available in Part XVA of the *Customs Act 1901*, the foreword to the Schedule of Concessional Instruments (SCI), the administrative guidelines in Volume 13 of the Australian Customs Service (ACS) Manual, or by phoning (06) 275 6666.
- 9 Customs may require an applicant to substantiate with documentary evidence any information provided on the application form.
- 10 TCOs are available for use by any importer and are published in the SCI and in TAPIN. Before lodging a TCO application, check to ensure an existing TCO does not already cover the goods.

--

SUBSTITUTABLE GOODS

- (1) *Local Manufacturers' goods are substitutable when they are put, or are capable of being put, to a use that corresponds with a use including a design use) to which the goods the subject of the application can be put (subsection 269B(1) of the Customs Act 1901). Even if not identical, locally made goods may be substitutable goods.*
- (2) *In determining whether the uses of Australian produced goods correspond with the uses of the goods the subject of the application - it is irrelevant whether or not the goods compete with each other in any market.*
- (3) *Applications will be rejected if they fail to provide sufficient information as to inquiries made by the applicant to establish that there are reasonable grounds for believing that no substitutable goods are produced in Australia.*

5 Provide details of the nature of ALL inquiries you have undertaken in order to establish that substitutable goods are not produced in Australia in the ordinary course of business and the results of those inquiries.

1. s47F DIRECTOR OF QUANTUM SCIENTIFIC ADVISED OF NO KNOWN MANUFACTURER OF PIPET TIPS WITHIN AUSTRALIA. HIS ONLY SUGGESTION WAS A COMPANY CALLED TECHNOPLAS IN ADELAIDE.

2. AFTER CONTACT WITH TECHNOPLAS THEY CONFIRMED, THEY DID NOT MANUFACTURE PIPET TIPS AND COULD ONLY SUGGEST CONTACT WITH DISTRIBUTORS OF IMPORTED TIPS.

3. I SPOKE WITH A HANDFUL OF DISTRIBUTORS AND THEY AGAIN CONFIRMED THE ONLY PIPETSTHEY SELL ARE IMPORTED.

4. FINALLY I CONTACTED THE SCIENTIFIC SUPPLIERS ASSOCIATION OF AUSTRALIA. A s47F AGAIN CONFIRMEDTHE FACT THAT THERE ARE NO PIPET TIPS MADE IN AUSTRALIA. (PLEASE SEE HIS ATTACHED ADVICE

6 Provide any additional information in support of discharging your responsibility to establish that there are reasonable grounds for asserting that there are no substitutable goods produced in Australia in the ordinary course of business.

AFTER INQUIRIES UNDERTAKEN BY MYSELF, I AM CONFIDENT THERE ARE NO PIPET TIPS MANUFACTURED WITHIN AUSTRALIA, IN THE ORDINARY COURSE OF BUSINESS.

ON THE INFORMATION CONTAINED IN THIS TARIFF CONCESSION APPLICATION, AND THE ATTACHED ADVISE FROM THE SSAA. I FEEL THIER ARE SUITABLE GROUNDS FOR THE GRANTING OF A TARIF CONCESSION FOR PIPET TIPS.

PRESCRIBED ORGANISATIONS

7 Have you made inquiries of a prescribed organisation to obtain advice about whether there are producers in Australia of substitutable goods?

☒ YES ☐ NO If YES attach a copy of advice received.

Note that under subsection 269M(6) of the Customs Act 1901, the CEO may, despite section 16 of the Customs Administration Act 1985, give a copy of all, or of a part, of the application to a prescribed organisation.

Pipet Tips**1**

Features & Benefits

"An excellent fitting pipet tip is one that allows the pipettor to reach its peak performance."

Recognized as the world leader in pipet tip manufacturing, our goal is, has been and always will be to provide the best fitting tip on the market. Today, there are no longer just a few pipettors to consider when making a pipet tip. Dimensional variations from one pipettor to the next and a wide variety of applications dictates the need for a myriad of pipet tips.

With close to fifty pipet tips covering a volume range of 0.1 to 10,000ul, available with or without filters, in a variety of colours, materials and packaging configurations, the researcher can select the best fitting tip for their particular pipettor and application.

QSP's pipet tips are made from virgin polypropylene material and are precision moulded for airtight fit using state of the art moulds and moulding methods to preserve non-wettability in the final product. Note: QSP does not use a mould release agent.

Metal Free Tips

All material used in the manufacture of our pipet tips has been formulated without intentional addition of heavy metals. The combined level of trace elements does not exceed the 1994 CONEG Model legislation limits of 100 ppm. Certificate available upon request.

Certified Pipet Tips

Independently tested and certified to be RNase free, DNase free and Pyrogen free. (Non-Sterilized is not certified as pyrogen free.) Certificate available upon request.

Sterilized Tips

For those who prefer not to autoclave, we offer Pre-Sterilized (Gamma-Cobalt 60 Irradiation) tips. Certificate available upon request.

Autoclavable Tips & Racks

Pipet tips and racks are autoclavable at a recommended temperature of 120°C at 15 pounds of pressure for 15 minutes.

First-Class Filter Tips

Specifically designed for PCR* work.

Low Adhesion Tips

Minimize liquid retention and ensure optimum sample yield.

Gel-Loading Tips

Useful for a wide variety of sample loading applications.

Graduated Tips

Provides reference lines to allow a quick check of pipetting procedures by indicating nominal liquid volume in tip.

Extra Long Tips

For those hard to reach places.

Thin Wall Orifice Tips

Improves small volume pipetting. Reduces liquid retention.

Wide Orifice Tips

Eliminates shearing of fragile cells. Helps in pipetting small volumes of viscous materials.

Bevelled Orifice Tips

Reduces liquid retention.

Liquid Level Sensing Tips

Manufactured of Carbon Black-Conductive Polypropylene for robotic liquid handling systems.

Pipet Tips

1

Packaging Options

Bagged

economical package

Our bagged (bulk) tips are the economical choice for those refilling empty QSP racks. The majority are packaged 1,000 tips in a heavy duty ziplock bag, 10 bags per case.

96 Tip Rack - Standard

most popular - features convenient lift off cover - ideal for multi & single channel pipetting

QSP's versatile 96 tip rack, with its convenient 8 x 12 format accommodates multi and single channel pipettors. Precise hole spacing offers perfect alignment with 96 well microtiter plates. This rack has the popular lift off cover and sonically welded base. The entire unit is completely autoclavable*. Packaged 96 tips per rack, 10 racks per unit, 5 units per case.

96 Tip Rack - Hinged

features attached cover - accommodates multi single channel pipettors

With a unique closure that is easy to open and close yet remains latched when necessary, QSP hinged racks also feature "stacking walls" on both the top and bottom of the rack to provide extra stability when stacking one on top of the other. The top can be left partially open for complete steam penetration when autoclaving. Superior construction provides maximum support for mounting tips on multichannel pipettors. Each rack holds 96 tips in the 8 x 12 format. Packaged 10 racks per unit, 5 units per case.

Note: The four posts on the hinged rack insert are for securing the QLS tip carrier in place. Please refer to "QLS" for further information.

96 Tip Heavy Duty Compartment Rack

eliminates cross contamination - extra stability for automated liquid handling systems and multi-channel pipettors

The inner wall structure adds extra stability, making our heavy duty compartment rack ideal for use with automated liquid handling systems and multichannel pipettors. It is completed with our lift top cover and sonically welded base. This heavy duty rack features 96 individual inner compartments keeping tips separated from each other to eliminate the possibility of cross contamination. The entire unit is completely autoclavable*. Packaging is the same as our standard 96 tip rack.

100 Tip Rack

accommodates large volume and extra long tips - ideal for single channel pipetting

Each rack holds 100 large volume or extra long tips. With its sonically welded base and lift top cover, the entire unit is completely autoclavable*. Rack extensions are used for extra long tips. Quantity per unit and case vary.

Note: A specially designed 100 tip rack is used for our ultra micro #114 tip

200 Tip Rack

accommodates small volume tips - ideal for single channel pipetting

Our 200 tip rack also has a sonically welded base, lift top cover, and is completely autoclavable*. Loaded with small volume tips, it is ideal for those working with single channel pipettors. Packaged 200 tips per rack, 5 racks per unit, 10 units per case.

* Refer to Section 6 for recommended autoclaving instructions.

Pipet Tips

1

Packaging Options

Stack Rack System

*offers the convenience of racked tips
at an economical price*

QSP's stack rack systems utilize the same rack, base and lift top cover as our 100 and 200 tip racks. These systems offer the convenience of racked tips at an economical price.

The 100 tip rack is nested five high; with a welded base on the bottom rack and completed with a lift top cover. Two stacks (5 racks of 100 tips) are shrink wrapped together.

Our 200 tip rack is also nested five high; with a welded base on the bottom rack and completed with a lift top cover. The unit (5 racks of 200 tips) is shrink wrapped.

Both can be autoclaved, however, our stack racks are primarily designed for those who do not autoclave tips.

204 Tip Rack

*speciality tips
gel loading & extra long*

Designed specifically for the longer gel loading and small volume extra long tips. Rack hole configuration is 12 x 17. Completed with a sonically welded base and lift top cover. Extra long tips require a rack extension. Each unit is completely autoclavable*. Quantity per unit and case vary.

Single Wrap - Sterilized

available in small quantities

Pre-sterilized, these individually wrapped tips are ideal for those times when only a few tips are needed. Due to small quantity requirements, QSP offers these tips for sale by the unit or case.

QLS® Quality Loading System

*economically priced
easy to use
environmentally conscious*

Our patented QLS® (Quality Loading System) is easy to use, economically priced and environmentally conscious. Each unit consists of 5 preloaded tip carriers (96 tips each) and offers immediate savings by reloading empty tip racks that have already been paid for. Valuable storage space and plastic waste are significantly reduced. Designed for use with QSP's lift top cover racks or hinged racks.

* Refer to Section 6 for recommended autoclaving instructions.

Pricing, Terms and Policies

Pricing Information

Every effort is made to maintain price stability, however due to unforeseen circumstances such as the growing costs of material, packaging supplies, labour, insurance etc., we reserve the right to change prices without prior notice.

Terms

For customers with approved credit, terms of sale are nett 30 days.

Standing Orders

Standing orders are invited and may include a number of items.

Return Policy

For assistance please contact our customer service department.

Product Samples

Free samples for evaluation purposes are available upon request with the exception of Sterilized products.

SATISFACTION GUARANTEED

All QSP products are guaranteed to meet or exceed the Original Equipment Manufacturers' specifications.

Re: Pipette Tips	

Dear s47F

Our telephonic discussion of yesterday refers. Having being in a senior management position with the SSAA and previously with Australia's largest supplier of scientific products for fifteen years, I advise that there are no known manufacturers of pipettes in Australia at this time.

Since your call I have made further inquiries which appear to have confirmed my advice of yesterday that there do not appear to be any local manufacturers of pipette tips in Australia at this time.

Yours sincerely,
s47F

Dear Sir/Madam,

TARIFF CONCESSION - APPLICATION ACCEPTANCE

Your application for a Tariff Concession Order (TCO) has been accepted by Customs as a valid application. The application will be published in Gazette No. TC 98/29 of 22 JUL 98. Details of the gazette notice are shown in the attachment.

Please examine the wording of the gazette notice and advise this office immediately if the wording does not accurately describe the goods for which a TCO has been sought. This is a verification of agreed wording, not an opportunity to further amend.

Yours faithfully,

s22(1)(a)(ii)

Dear Sir/Madam,

TARIFF CONCESSION SYSTEM - APPLICATION SUCCESSFUL

I refer to your application for a Tariff Concession Order (TCO) lodged on 29 JUN 98.

As a delegate of the Chief Executive Officer, I am satisfied that the application meets the core criteria on the basis of paragraph 269C of the Customs Act 1901 and have accordingly made a written Tariff Concession Order.

The decision to make a TCO will be published in Gazette No. TC 98/38 of 23 SEP 98.

The TCO, as detailed in the attachment, will be published in the Schedule of Concessional Instruments as soon as possible.

Yours faithfully,
