*received 8/12/14*

Hi,

TCO application, IDM and required searches for toilet suites attached on behalf of Caroma Industries. Caroma was the only Australian manufacturer of these goods but ceased production in Australia this month.

The goods are classified 6910.10.00 as the pan and bowl are vitreous china, however given that the seat and lid are probably plastic and some have metal panels, buttons, hinges and similar components I do not wish to specify material in the TCO given recent decisions by Customs on tariff classification.

Thanks, s47F [redacted]

Is this application intended to support an application for a concession under the Enhanced Project By-law Scheme?

YES     NO

**1. DESCRIPTION OF GOODS**

- (a) The description of the goods in the application may be used as the description of the goods in the TCO (if made).
- (b) The application must provide a full description of the goods, including the physical features of the various components of the goods. It must not describe the goods in terms of what they do.
- (c) In accordance with section 269SJ of the *Customs Act 1901*, the CEO must **not** make a TCO in respect of goods:
- (i) described in terms other than in generic terms; or
  - (ii) described in terms of their intended end use; or
  - (iii) declared by the regulations to be goods to which a TCO should not be extended.
- Goods will be taken to be described in terms other than in generic terms if, for example, their description, either directly or by implication, indicates that they are goods of a particular brand or model, or that a particular part number applies to the goods.
- (d) Guidance on the drafting of the description of goods is contained in relevant Practice Statements and/or Instructions and Guidelines on the Internet at [www.customs.gov.au](http://www.customs.gov.au). Failure to comply with Customs requirements may result in rejection of the application.

**Describe the goods as you would propose the wording to appear if the Tariff Concession Order is granted.**

- a) Pan;
- b) Cistern;
- c) Detachable seat with hinged lid

**2. ILLUSTRATIVE MATERIAL**

**Attach technical and illustrative descriptive material (IDM) as well as any extracts from the relevant industry standard (if referred to in the description of the goods) and/or a sample to enable full and accurate identification of the goods the subject of the application. This application will be rejected if insufficient or inadequate IDM is provided.**

Please note that simply supplying a reference to a website is not acceptable.

**3. TARIFF CLASSIFICATION**

- (a) Identify the tariff classification (to 8 figure subheading level)
- (b) Identify the General Duty rate 5 %
- (c) If a Tariff Advice for the goods has been sought or obtained, please provide the TA No.  or attach a copy.

## 4. USES OF THE IMPORTED GOODS

Describe ALL uses (including design uses) to which the goods can be put.

Lavatory

## 5. INFORMATION THAT THE APPLICANT AND IMPORTER HAS REGARDING AUSTRALIAN MANUFACTURERS OF SUBSTITUTABLE GOODS OR POTENTIALLY SUBSTITUTABLE GOODS

The following questions require the applicant and the importer (if a different party to the applicant) to provide details of all information that they have with regard to the presence of Australian manufacturers of substitutable goods or potentially substitutable goods.

**5A - APPLICANT.** In considering the goods which are the subject of this TCO application, is the applicant aware of any Australian manufacturers or producers of substitutable goods, or of potentially substitutable goods?

YES     NO If YES, please provide the names of these Australian manufacturers or producers.

**5B. - IMPORTER** - In considering the goods which are the subject of this TCO application, is the importer (as listed on page 2) aware of any Australian manufacturers or producers of substitutable goods or potentially substitutable goods?

YES     NO If YES, please provide the names of these Australian manufacturers or producers.

**5C.** Please provide details of other information that the applicant and/or importer may have to assist in locating any local manufacturers.

**Information for applicants - some useful definitions from the Customs Act 1901****269B Interpretation**

**substitutable goods**, in respect of goods the subject of a TCO application or of a TCO, means goods produced in Australia that are put, or are capable of being put, to a use that corresponds with a use (including a design use) to which the goods the subject of the application or of the TCO can be put.

- (3) In determining whether goods produced in Australia are put, or are capable of being put, to a use corresponding to a use to which goods the subject of a TCO, or of an application for a TCO, can be put, it is irrelevant whether or not the first-mentioned goods compete with the second-mentioned goods in any market.

**269C Interpretation—core criteria**

For the purposes of this Part, a TCO application is taken to meet the core criteria if, on the day on which the application was lodged, no substitutable goods were produced in Australia in the ordinary course of business.

**269D Interpretation—goods produced in Australia**

- (1) For the purposes of this Part, goods, other than unmanufactured raw products, are taken to be produced in Australia if:
- the goods are wholly or partly manufactured in Australia; and
  - not less than  $\frac{1}{4}$  of the factory or works costs of the goods is represented by the sum of:
    - the value of Australian labour; and
    - the value of Australian materials; and
    - the factory overhead expenses incurred in Australia in respect of the goods.
- (2) For the purposes of this Part, goods are to be taken to have been partly manufactured in Australia if at least one substantial process in the manufacture of the goods was carried out in Australia.
- (3) Without limiting the meaning of the expression **substantial process in the manufacture of the goods**, any of the following operations or any combination of those operations does not constitute such a process:
- operations to preserve goods during transportation or storage;
  - operations to improve the packing or labelling or marketable quality of goods;
  - operations to prepare goods for shipment;
  - simple assembly operations;
  - operations to mix goods where the resulting product does not have different properties from those of the goods that have been mixed.
- (4) For the purposes of this section, the CEO may, by instrument in writing published in the *Gazette*:
- direct that the factory or works cost of goods is to be determined in a specified manner; and
  - direct that the value of Australian labour, the value of Australian materials or the factory overhead expenses incurred in Australia in respect of goods is to be determined in a specified manner;
- and those directions have effect accordingly.
- (5) The provisions of sections 48 (other than paragraphs (1)(a) and (b) and subsection (2)), 48A, 48B, 49A and 50 of the *Acts Interpretation Act 1901* apply in relation to directions given under subsection (4) as if:
- references in those provisions to regulations were references to directions; and
  - references in those provisions to the repeal of a regulation were references to the revocation of a direction.

**269E Interpretation—the ordinary course of business**

- (1) For the purposes of this Part, other than section 269Q, goods (other than made-to-order capital equipment) that are substitutable goods in relation to goods the subject of a TCO application are taken to be produced in Australia in the ordinary course of business if:

- (a) they have been produced in Australia in the 2 years before the application was lodged; or
- (b) they have been produced, and are held in stock, in Australia; or
- (c) they are produced in Australia on an intermittent basis and have been so produced in the 5 years before the application was lodged;

and a producer in Australia is prepared to accept an order to supply them.

(2) For the purposes of this Part, goods that:

- (a) are substitutable goods in relation to goods the subject of a TCO application; and
- (b) are made-to-order capital equipment;

are taken to be produced in Australia in the ordinary course of business if:

- (c) a producer in Australia:
  - (i) has made goods requiring the same labour skills, technology and design expertise as the substitutable goods in the 2 years before the application was lodged; and
  - (ii) could produce the substitutable goods with existing facilities; and
- (d) the producer is prepared to accept an order to supply the substitutable goods.

(3) In this section:

***made-to-order capital equipment*** means a particular item of capital equipment:

- (a) that is made in Australia on a one-off basis to meet a specific order rather than being the subject of regular or intermittent production; and
- (b) that is not produced in quantities indicative of a production run.

Close coupled toilet suites have a very traditional look. The cistern is fitted directly to the pan so that it becomes a complete unit, avoiding the need for visible connection pipes. It may be one of the most functional fixtures in the home, but the power of a well-chosen toilet shouldn't be underestimated..

Concealed toilets feature a hidden cistern, which can be placed in a wall cavity, roof space or under a vanity benchtop. The cistern is guaranteed not to leak in the wall, and all cistern components can be accessed via the button panel for easy service by your plumber without having to remove tiles. Concealed toilet suites are the latest in bathroom vogue and are ideal for a smaller bathroom with only the pan being visible against the wall. It may be one of the most functional fixtures in the home, but the power of a well-chosen toilet shouldn't be underestimated in your bathroom design.

Connector or linked toilet suites allow the most flexibility in toilet pan set outs as they are a two piece system. This toilet style comprises of a cistern and pan that is linked via a flush pipe, allowing the pan to sit further away from the cistern. Most Caroma connector toilets come standard with a flush pipe connector plate that hides the connecting pipe work, giving it a close coupled toilet suite look. Connector toilets are perfect for renovations or where longer pan set out dimensions are required.

A Wall faced toilet suite's most distinct feature is that the back of the pan sits flush against the wall, creating a seamless finish and streamlined look. Also known as a back to wall toilet, this style of toilet prevents dust or dirt falling behind the toilet and is therefore easier to clean. It may be one of the most functional fixtures in the home, but the power of a well-chosen toilet shouldn't be underestimated.

**Subject:** RE: URGENT: Amended wording - TCO 1442918 - Toilet suites [SEC=UNCLASSIFIED]

Hi s22(1)(a)(ii) [redacted]

Yes that's fine. Although it may not be in the IDM its common knowledge that toilet seats need to be replaced and therefore it doesn't need to be, but as it doesn't change the meaning we will agree, provided an officer doesn't in future claim it doesn't apply because it's not a full description. Sadly industry feedback is that it happens too much these days.

Have a safe and happy Christmas.

**Subject:** URGENT: Amended wording - TCO 1442918 - Toilet suites [SEC=UNCLASSIFIED]  
**Importance:** High

Good afternoon s47F [redacted]

Please see below amended wording for your possible agreement. I couldn't locate any mention of 'detachable' on the IDM, therefore I've amended to as below.

**TOILET SUITES, including ALL of the following:**

- (a) pan;
  - (b) cistern;
  - (c) seat with hinged lid
- Op. 08.12.14 - TC 1442918

**Stated Use:**

**Lavatory**
