 [SEC=UNCLASSIFIED]

Hi s. 22(1)

Thank you very much for the detailed response. I think there are some good options there to find a way forward with this.

As it happens, s. 47F(1) has just sent a letter to our Minister to complain about our processing times given the quantity we are currently dealing with.

I am looking to meet with ABF at the Qld office in the next few weeks. Is there anyone else I should be speaking with to progress this.

Thanks again for your assistance

UNCLASSIFIED

s. 47B(a), s. 47F
 Hi

You will recall that we discussed the option of an ongoing police certification to import gel-ball imitation firearms at the Firearms and Weapons Policy Working Group meeting last week. My team has done some research into this matter which is summarised below.

- In Queensland, the laws for imitation firearms are less strict than most other states and territories.
- Imitation firearms are controlled at the border under Item 1A of Part 2 of Schedule 6 of the *Customs (Prohibited Imports) Regulations 1956*. Regardless of whether imitation firearms are controlled within a state or territory, a B709A form is required to import these items.

- Other states and territories generally require individuals to hold a firearms licence to possess imitation firearms. The majority of importers of gel-ball imitation firearms do not possess a firearms licence, and therefore their importation in those states and territories is generally prohibited.
- The B709A form currently used by QPS to authorise import of gel-ball imitation firearms cannot be used for ongoing certification due to the form being single use.
- The B709X form may be used by police firearms and weapons registries to satisfy the police certification test for Schedule 13 weapons only.
- Form B709DA is restricted to use by firearms dealers who are licenced appropriately to possess the Schedule 6 firearms (or components, ammunition etc.). The form may also be used by firearms dealers for when the items listed on the form do not require a licence or authorisation to possess (including imitation firearms). Individuals who are not firearms dealers cannot use a B709DA form.

s. 47B(a)

Let me know what you think.

ISSUE

Matters relating to Gel Ball Blasters has steadily increased in difficulty since the Commonwealth began treating them as imitation firearms (for importation purposes) in late 2017.

BACKGROUND

When they were first imported, Gel Ball Blasters were controlled as Soft Air (Air Soft) firearms, Item 1 under Schedule 6 of the *Customs (Prohibited Imports) Regulations 1956* (the Regulations). On 14 December 2017, a Queensland Magistrate decision (*Customs v Clarke CFP Pty Ltd - Attached*) changed this. Gel Ball Blasters are now, at the highest level of control, considered to be Imitation Firearms – Item 1A under Schedule 6 of the Regulations – which can only be imported with Police certification.

Since that time, the materials and technology being used by manufacturers to construct Gel Ball Blasters, and their parts, has evolved. The biggest issue facing the Australian Border Force and the Australian Federal Police is differentiating between parts for Gel Ball Blasters and parts for Air Soft firearms.

Advice from the Australian Federal Police (acknowledged by the gel ball community) is that Gel Ball Blasters and Air Soft firearms operate in exactly the same manner.

The Commonwealth is currently exploring interim options to resolve this issue in advance of any amendments to the Regulations.

ACTION REQUESTED BY MEMBERS

Please come prepared to discuss Gel Ball Blaster-related matters in your jurisdiction, for example police assistance required at an incident involving a firearm which was in fact a Gel Ball Blaster.

We would particularly be interested in hearing from jurisdictions which do not allow the importation of Gel Ball Blasters.

 Released by the Department of Home Affairs
under the Freedom of Information Act 1982

BENCH: Right. This is an action for a declaration and order under the Customs Act for the condemnation of goods, namely, what the complainant says are 492 soft air rifles and soft air handguns. The complaint was further amended on the day of the hearing to delete the claim for forfeiture of gel pellets also seized from the respondent. The factual matters as averred by the complainant are generally not in dispute, apart from the central averment, that being that the seized items are what is described as either “soft air firearms” or, again, “firearms” throughout the complaint.

The issue for determination is very narrow. The position of the parties is that should the goods be found to be firearms within the meaning of that term as defined in regulation 4F of the Customs (Prohibited Imports) Regulation 1956, then the goods will also fall into one or other of further subcategories provided for in the regulations that have the effect of providing that the goods will be special forfeited goods within the meaning of the Customs Act and require to be forfeited to the Crown. Should the goods be found not to be firearms within the meaning of regulation 4F, the complaint will fail. I am told by the complainant that the standard of proof is the reasonable satisfaction of the Court. The issue for determination is, therefore, a narrow one, as I said and are the seized items firearms or not.

“Firearm” is defined in regulation 4F as, relevantly, “a device designed or adapted to discharge shot bullets or other projectiles by means of an explosive charge or a compressed gas, whether that device is fitted with a magazine or other fitting device designed to be used with it or not”. It is conceded by the respondent that the seized items are devices designed to discharge projectiles by means of a compressed gas. The issue is further narrowed on the respondent’s case to whether or not the gel pellets fired by these items are “other projectiles” within the meaning of regulation 4F, the seized items being incapable of firing shot or bullets.

The purpose of regulation 4F was discussed by Justice Kiefel in the CEO of Customs v Granite Arms Proprietary Limited [2004] 136 FCR 515. Neither party disputes the correctness of her Honour’s statements in that case. I agree with the respondent’s submission that regulation 4F is directed to the prohibition of firearms that fire bullets, shot or similar types of physically dangerous ammunition, and that the regulation is not directed to the prohibition of toys despite their appearance.

The respondent submits that the purposive approach to statutory interpretation, consistent with the principles stated by the High Court in *Prospect Blue Sky Incorporated v The Australian Broadcasting Authority*, must be applied by the Court to determine what the Parliament by the term “other projectiles” in regulation 4F. The respondent submits that the other projectiles referred to in regulation 4F must be interpreted to be *eiusdem generis* with the preceding words, “bullets and shot”. “Other projectiles” ought, therefore, the respondent submits, be construed as being limited to the same kind of projectiles as the particular words. The words “other projectiles” are so wide that they could, arguably, capture anything capable of being discharged by a device, which if it operates by means of compressed gas would therefore fall within the definition of a firearm.

Evidence was given by both Mr Jackson and Mr Tolley that some nerf guns fire nerf darts by means of compressed gas and that the relevant authorities, State and Federal, do not regard nerf darts as being a projectile falling within the meaning of regulation 4F. In the case of the seized items here, it is common ground that they all fire gel balls, which when hydrated are largely made of water and that at least two of the types of seized items also fire nerf darts. The evidence of both Mr Jackson and Mr Tolley was the effect that the hydrated gel balls after firing disintegrate on impact with the target or, if not with the target, whatever they happen to hit.

I agree with the respondent that the general words “other projectiles” ought to be construed in the context of the particular words that precede them, namely, “shot and bullets”. It would be absurd to imagine that in the circumstances in which regulation 4F was enacted, as outlined by Justice Kiefel in the case I have already referred to, that Parliament also intended to capture toys. The attitude taken by the authorities to guns firing nerf darts supports that conclusion. I accept the submission that the Parliament intended by the use of the words “other projectiles” to capture metal or other hard ammunition capable of causing injury or death. I do not accept that the general words were intended to capture objects that are ultimately harmless or relatively harmless when impacting with a person.

In those circumstances, I am not satisfied that gel balls are captured by the term “other projectiles” as used in regulation 4F. As the seized items are not capable of discharging shot, bullets or other projectiles, they do not, in my view, fall within the definition of “firearm” within regulation 4F. Having said that, whilst I accept the expertise of Mr Jackson and appreciate the assistance given by his report, his naming each of the seized items as a “soft air firearm” has the tendency to obscure the real character of the seized items. Mr Jackson conceded that no official definition exists as to what is a “soft air firearm” and that it appears to merely refer to the mechanism by which the gel balls are expelled. Use of the term “soft air firearm” in Mr Jackson’s report, which is exhibit 1, does not bring the items within the definition of “firearm” in regulation 4F, as the test is, as discussed, more extensive than merely the mechanism of firing the item.

I have been assisted by exhibit 10, a confirmation issued to the respondent by the Queensland Police Service that the seized items are legal to be possessed in Queensland without licence or authority and that the Queensland Police Service in the attachment to exhibit 10, having inspected them, appears to classify these items as “projectile toys”. Despite the appearance of many of the seized items closely resembling real types of firearms, I am not persuaded by the complainant’s submission that the mere appearance of an item may cause “harm” of the type referred to by Justice Kiefel. The use of an item closely resembling a real weapon for some nefarious purpose will, no doubt, constitute a criminal offence of one type or another, but is not relevant, in my view, to the question of whether or not such an item meets the definition of a firearm in regulation 4F.

In this case, despite their appearance, the items are on the evidence only capable of firing a water-based pellet and, in my view, are properly classified, as the

Queensland Police Service has concluded, as “projectile toys”. In all of the circumstances and having regard to the evidence, I am not satisfied to the required standard that the complainant has discharged its evidential onus in relation to the seized items. I am satisfied, however, that the seized items are not “firearms” within the meaning of regulation 4F and they are, therefore, not special forfeited goods within the meaning of the Customs Act. The complaint will be dismissed and I order the seized goods – or I will order the seized goods to be returned to the respondent. Are there any submissions on costs?

10

...

BENCH: All right. The complaint is dismissed and the complainant is to pay the respondent’s costs fixed at \$2000 and I order that the seized items the subject of the complaint be returned to the respondent. All right. Thank you.

UNIDENTIFIED SPEAKER: Thank you, your Honour.

20 BENCH: You’re excused.

Subject: Gel ball blasters [DLM=For-Official-Use-Only]

For-Official-Use-Only

Good afternoon s. 47B(a), s. 47F and s. 47B(a), s. 47F

As discussed at our meeting a couple of weeks ago, I've put together some points below on the treatment of gel ball blasters at the Cth level for the purposes of importation.

There are three main points to be aware of upfront.

- Gel ball blasters *are not treated* as firearms for the purposes of the *Customs (Prohibited Imports) Regulations 1956*.
- Gel ball blasters *can still meet the* definition of an 'imitation' under the Regulations and therefore require Police Certification in order to be imported.
- Airsoft firearms (such as those that fire 6mm and 8mm BBs) *are controlled* as firearms under the Regulations.

In practice, we understand that this causes difficulties with determining the difference between what is a gel ball blaster and what is an airsoft firearm – especially in relation to parts.

In terms of classification on importation, two principles may assist.

- An article that can fire 6mm or 8mm BBs can be classified as a firearm under the Regulations, even if it can also shoot hydrolysed gel balls.
- A part can be classified as a firearm part under Item 2B in the Regulations even if it is also a part for an imitation firearm. In practice, this means that a part that fits both a gel ball blaster and an airsoft firearm can be controlled as an Item 2B article.

s. 47E(d)

s. 47E(d)

Border Force and the AFP are therefore working together to provide guidance to officers at the border to assist in identifying gel ball blasters and airsoft firearms with more certainty.

I hope this is of assistance, and we'd be grateful if Qld Police could keep us informed about how things are progressing at your end.

Thanks,

s. 47B(a), s. 47F

Gel blaster parts do not require import permission. B709A is not required. However, if the Gel Blaster parts are parts made for air soft firearms or are compatible with air soft or real firearms (and these are what appear to be popular for upgrading Gel Blasters), then they will require import permission.

ABF have been seizing a lot of Gel Blaster Parts because they were manufactured for Air Soft firearms.

 Subject: B709 for Gel Blasters Parts

Hi s. 22(1)(a)(ii)

I am seeking some clarification on B709's being required for Gel Blaster parts. From September 2019, I hosted several meetings with the ABF, AFP, Home Affairs and Gel Blasters Associations. One of the many topics we covered were B709's, NOT being required for Gel Blaster parts. Yesterday I presented a PowerPoint to the Gel Blaster

community on the changes to legislation regarding replica firearms. At the conclusion of the meeting I fielded questions from several people who have been advised that ABF have informed them that a B709 is required to import Gel Blasters parts. Due to the fact this information came from several people I thought I would seek clarification from you. I hope this is not the case as it will cause a significant increase to our work load. If this decision has been reversed for whatever reason I hope we can discuss to find common ground moving forward.

Below is an Email sent to me by s. 47F(1) I have spoken to the Gel Blaster community on numerous occasions about Airsoft firearms and parts NOT being allowed in to QLD as a result of Schedule 6 of the *Customs (Prohibited Imports) Regulations 1956*.

Please do not hesitate to contact me to discuss.

Thank you,

Subject: Gel blaster parts B709a permits

Hey s. 47B(a), s. 47F thank you for your time today and I would like to take this opportunity to thank you and your team for all your hard work over the past 18 months or so i know it was a pain especially with a thorn like myself constantly poking you in your side hahaha

As per our conversation today at the meeting here are some screenshots from ABF which clearly state that if we are wanting to import these 'gel blaster' parts then we will need a B709a permit purely because some of the parts are known to be interchangeable with airsoft parts. These items are not illegal as they are just simply generic parts which can be used in numerous different hobbies

but mainly with airsoft. As im sure you understand we do not intend to ever import any major airsoft parts specific to airsoft for example

Hopper

Magazines

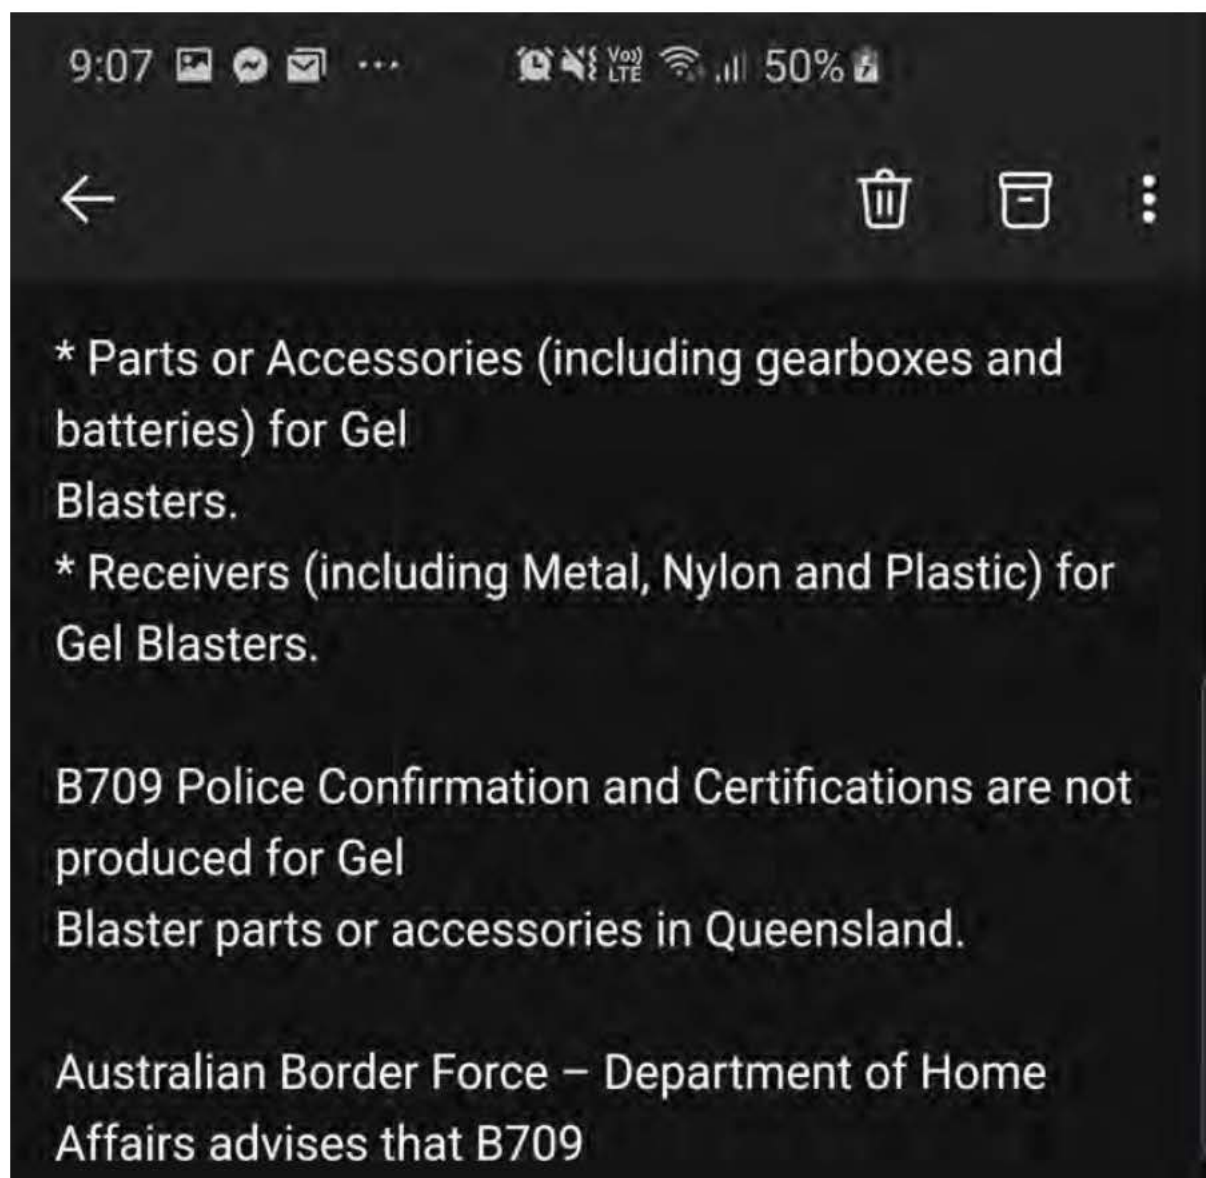

6mm barrels

These are purely generic parts like gears, springs, receivers, hanguards, mosfets etc etc etc

It would save everyone alot of heartache and pain if we could just get these permits sorted as im sure in the end it would make everyone's life easier. With current b709a issues imm attempt to work with the community to only apply for permits where they are actaully needed as i understand that greedy business is most likely causing alot of these delays

Many thanks

s. 47F(1)

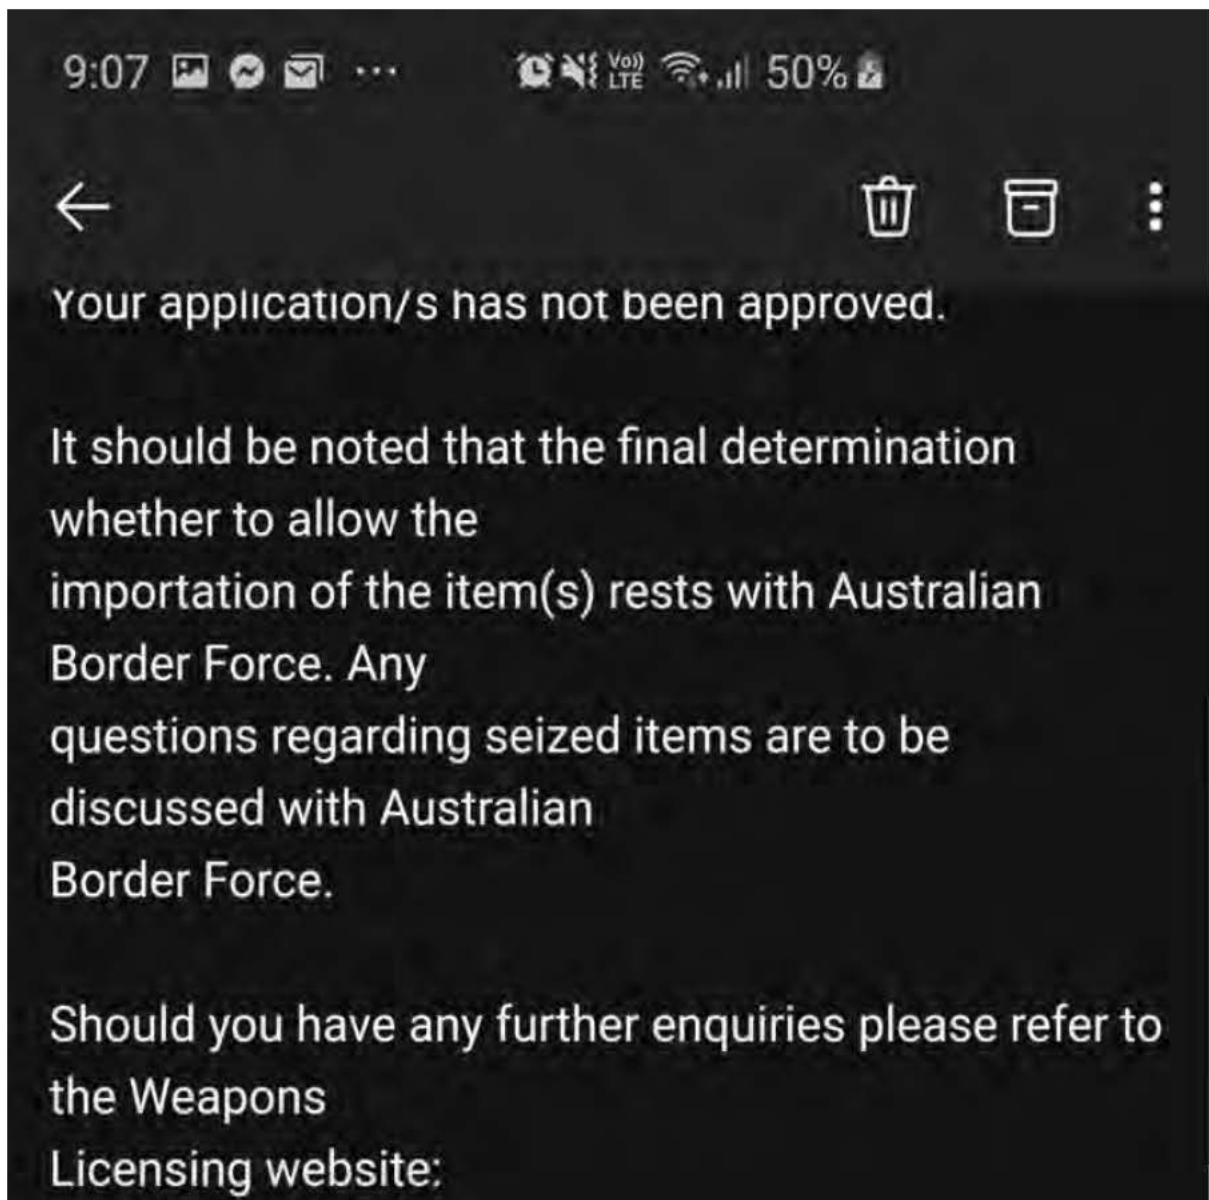

Police Confirmation and Certifications are not required for these items.

Your application/s has not been approved.

It should be noted that the final determination whether to allow the importation of the item(s) rests with Australian Border Force. Any questions regarding seized items are to be discussed with Australian Border Force.

Should you have any further enquiries please refer to the Weapons

The ABF requires import permission for air soft compatible parts. If the State Police Licencing body won't issue a permit for these items then you are out of luck. Home Affairs is a higher control and unless you have an extremely good reason for importing these items, I very much doubt you will be issued a Permit.

Nerf blasters themselves are non controlled . However, you will require a B709A Import Permit if the parts you are importing to upgrade them are compatible with controlled Firearms e.g. Soft Air.

The Permit is issued by the Weapons Licencing office of your State Police.

Subject: Final Email Gel Blaster Community - Replica Legislation Update (Meeting 24/08/2020)

Hi Everyone,

You have all expressed an interest in attending next week's meeting. Please ensure you are on time and gather outside the front entrance of the Brisbane City Police Station near the new coffee shop 'Espresso Engine' situated inside the foyer. I will carry out a role call and have someone take you up to level 15 four at a time. If you present with flu like symptoms you will be turned away as per our COVID-19 policy.

I look forward to seeing you all next week.

Subject: Gel Blaster Community - Replica Legislation Update (Meeting 24/08/2020)

Good morning everyone,

Please read the below carefully.

In order to provide some clarity and reassurance to you all on the upcoming legislation changes, I will be bringing our next meeting forward to **10:00am on Monday 24th of August 2020, at the Brisbane City Police Station located at 16 Mary St, Brisbane.** The meeting will last for as long as it takes to answer all of your questions or take notes for them to be answered at a later date. Due to limited seating capacity and keeping in mind COVID-19 distancing, I am asking everyone who would like to be present at this meeting to provide me with your details by **no later than the 4th of August 2020** –

s. 47B(a), s. 47F @police.qld.gov.au. Please do not attend the meeting if you have flu like symptoms. If we exceed seating capacity I will explore alternative options for you to view this session like live streaming. Even if you have already indicated a desire to attend the meeting I was going to hold in October 2020, please forward me your information again which must include.

- First Name
- Last Name
- Mobile Number
- Email Address - If, I identify a new Email Address I will add it to my list so future correspondence can be sent to you.
- Name of Business / Group or Other you are associated with, e.g. Retail Name, Gel Blaster Association Name, Gel Blaster Field Operator Name, Solicitor etc.

I understand the importance these amendments will have on your community and therefore appreciate the questions that have been forwarded to me. To assist in removing any misunderstandings and quell any fear mongering on what is going to occur moving forward, I respectfully ask for you to forward any questions you have to your Gel Blaster Associations if you are part of one so they can ensure the same question is not being asked on multiple occasions. Since March 2019, most of you have been to one of the six (6) meetings we have already held as a group or received one of the eleven (11) Emails I have sent out to you as a group. A lot of the questions you have been asking me have already been answered in previous meetings. It is for this reason I ask for you to hold off on forwarding me anymore questions so I can provide you all with a consistent answer at the same time during the next meeting. Answers from the questions of this meeting will be posted on the

Weapons Licensing web page - <https://www.police.qld.gov.au/units/weapons-licensing/weapons-news>.

Please also be mindful that the legislation changes will affect other groups like Collectors therefore time is needed to prepare a detailed presentation to you all.

I will be holding another meeting for the Gel Blaster Community from **10:00am on Monday 2nd of November 2020, at the Brisbane City Police Station**, once again this meeting will be open to anyone wanting to attend. I will take this opportunity to finalise any questions that have not been answered and discuss specifics leading up to the changes coming in to affect.

I once again appreciate your support and understanding.

Thank you,

Subject: Gel Blaster Proposed Legislation Update - 17/07/2020

Good morning everyone,

Yesterday the proposed legislation for replica firearms was passed in QLD Parliament. From Monday 1st of February 2021, these changes will come in to affect. Around the 1st of October 2020, I will host a meeting for anyone who wants to attend to further discuss our next steps and provide you with an opportunity to ask whatever you want, the only restrictions on this meeting will be seating capacity however I will review alternatives like live streaming. The main topics of discussion will be how you display your Gel Blasters in a shop, how they will stored when in public and how you can further support the STOP and Think campaign. Weapons Licensing will continue to process your B709's

like they do now which requires you to provide a quantity of what you would like to import and the make and model of the Gel Blasters. I must reiterate that nothing has changed and nothing will change from the conversations I have had with you all leading up to this point.

I will be working with our Media and Public Affairs Team to develop a communications plan to help get the message out to the public about these changes and further educate everyone about Gel Blasters. I will also take that opportunity to work with you on your own messaging to ensure people are using Gel Blasters in the correct manner. I have already advised other government agencies about these upcoming changes.

I appreciate your Emails of support for these changes and look forward to talking to you all soon. Have a great weekend.

Cheers, s. 47B(a), s. 47F

UNCLASSIFIED

Hi s. 47B(a), s. 47F

Thanks for coming to meet with us all yesterday. It was very useful.

Just to summarise the meeting:

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

Released by the Department of Home Affairs
 under the Freedom of Information Act 1982

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

Other Matters

ABF contact with QPS Weapons Licensing – team to contact s. 47B(a), s. 47F (s. 47B(a), s. 47F police.qld.gov.au or s. 47B(a), s. 47F) in the first instance regarding any issues including:

- s. 22(1)(a)(ii)
- clarification of QPS stand on any particular firearms/firearms parts eg gel blaster/air soft pistons etc.

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

QPS stand on robust (metal/hard nylon) gel blaster parts – QPS is in agreement that if these parts can be used on a “real” firearm then they will be treated like a “real” firearms rather than an imitation.

Consideration of B709 applications – if type/purpose of firearms/firearms parts is not clear, importer is asked for further information and further research is undertaken if necessary. ABF can query with QPS further if they have concerns about any particular firearm parts.

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

If I missed anything please let me know.

Kind regards

s. 22(1)(a)(ii)

Subject: MODIFICATION OF GEL BLASTERS

Dear s. 47B(a), s. 47F

Over the past several months, not only has there been a large volume of B709A applications received by Weapons Licensing for 'Gel Blasters', there has also been a notable spike in B709A applications for 'Gel Blaster' parts and accessories.

Most of these B709A applications have been lodged by existing, and recently registered retail businesses and operators within the Queensland Gel Blaster community, with the remaining percentage applied for by individuals for personal use.

It is important to note that some of these applications (on both ends of the spectrum) are now applying for 'Gel Blasters' and 'parts' that appear to be sourced from a wide variety of manufacturing or modification companies overseas.

For example, an application for a B709A may state "to import metal receivers and parts that are to be converted from Airsoft to Gel Blaster use only" or "to import a Polarstar F2 Engine Kit for Gel Blaster".

It is a well-known fact in the Gel Blaster community that the 'Gel Blasters' themselves are susceptible to damage, and malfunction quite easily, even when being used straight out of the box. A work-around for this common occurrence is to upgrade the blaster with higher quality parts and components, including receivers, circuit-boards, fishbones, trigger mechanisms, barrels, magazines, gearbox's, batteries and hop-ups etc.

Not only does using these upgraded parts assist in better accuracy, rate-of-fire, velocity and so forth, it opens the door wider for greater modification possibilities down the track.

Subject: QPS Gel Blaster Meeting - 21/06/2019

Hi Everyone,

This morning I met with several representatives of the Gel Blaster community. The businesses asked to attend the meeting were chosen based on geographical location, specialist areas to this field and influence had on Gel Blaster in QLD. I appreciate that more of you would like to have attended this meeting however it was essential for us to keep this group small in order to push information forward from the QPS to your community without delay. As this meeting has just ended all topics covered from these conversations will be expanded on and forwarded to you in more detail next week.

The topics covered during this meeting included –

- s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

- s. 22(1)(a)(ii)
- s. 22(1)(a)(ii)

s. 22(1)(a)(ii)

 Hi

I have attached the product list for ABF so hopefully, it will help them to identify or differentiate between airsoft & gelblaster parts. Please let me know if you prefer me to send it directly to ABF/s. 22(1)(a)(ii) as I have another list to be sent out (I need to split the whole list into 2 due to the size of the file).

Thank you & regards,

Subject: Gel Blaster Association Meeting No.2 - 08/10/2019

Hello,

As it stands I have not received any questions from your Associations. I appreciate the response from those Associations who have provided information and images of Field Operators who are displaying Gel Blaster safety messaging, I have forwarded this material on to the relevant section.

will be introducing a report for AFP and Home Affairs to evaluate. This report outlines the differences between Airsoft firearms and Gel Blasters.

1. I have been asked to expand on the statement made by Senior Sergeant s. 47B(a), s. 47F from the last meeting. **I was asked if the QPS has an intention to legislate Gel Blasters?**

I will re-introduce questions from the previous meeting which are being reviewed by Home Affairs.

2. Is it legal to convert airsoft gearbox to a Gel Blaster gearbox? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*
3. Can we import external Gel Blaster accessories that interchange-able to airsoft? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*
4. Can we import Airsoft converted Gel Blasters? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*
5. How does ABF differentiate Airsoft parts and Gel Blaster parts? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*
6. Is it possible to obtain a list of banned Airsoft parts? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*
7. Could ABF/Home Affairs explain the legislative rule and interpretation they are using when seizing products such as Gearbox Housings, Gears and also decorative Osprey Suppressors? *The answer to this question is being reviewed by Home Affairs, there is no time limit on when a response will be provided.*

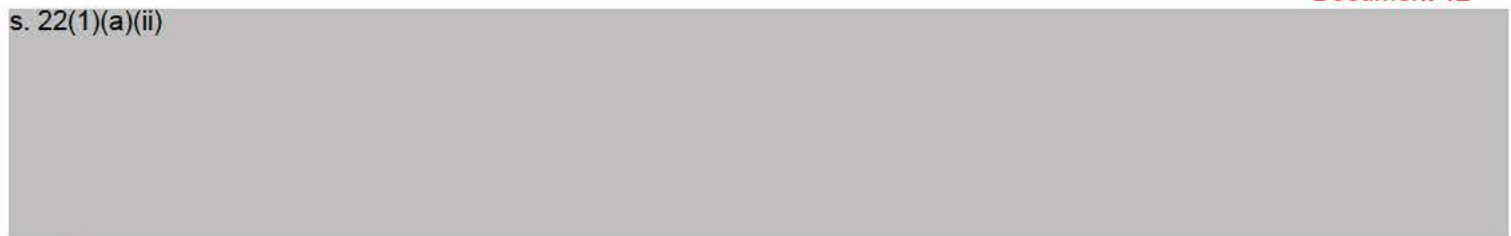

Please be prepared to provide feedback on the question asked by s. 47F, s. 47E(d) at the last meeting - s. 22(1)(a)(ii)

?

Please find attached an Email sent on the 8th of September 2020, to a business registered to yourself.

To answer your question directly about Gel Blaster parts, Weapons Licensing does **NOT** make a determination on Gel Blaster parts that is up to the Australian Border Force, this point has been reiterated to the Gel Blaster community on multiple occasions and is also mentioned on the Weapons Licensing Internet page.

Please familiarise yourself with information relating to your question prior to contacting Weapons Licensing. You do **NOT** need a B709 for Gel Blaster parts.

This Email will be retained by Weapons Licensing should it be needed for future referencing.

Subject: Legalities of gel blaster parts

Hi QPS

Are "airsoft compatible parts" legal to own in QLD?
If I can elaborate.

The majority of parts in a gel blaster fit into an AS gun and vice versa.

Except for 5 essential airsoft SPECIFIC parts;

Hopper
6mm barrel
6mm magazine
Bbs
Nozzle tip

These are the only difference in parts between an airsoft gun and a gel blaster.

Without these parts every other part is just as compatible in an AEG airsoft gun as it is an AEG gel blaster. Without airsoft specific parts we will always only ever be fixing and modding gel blasters.

The following are AEG airsoft and AEG gel blaster compatible parts

Gears
Pinion gears
Tappet plates
Springs
Cylinders
HPA engines
Motors
Electical mosfets
Pistons
Triggers
Cylinder heads
Gearboxes

So are airsoft/Gel blaster compatible parts legal to own in Queensland?

Not bringing the import factor into play.

Myself and other sellers are curious for our peace of mind, QPS stance on the legality of compatible parts.

These compatible parta are on every shelf in every shop in Australia.

So id assume QPS have no issue with compatible parts. But running of am assumption isnt comforting whrn your life savings are in the 1 basket.

It would be comforting having it verified by QPS because I don't think it's ever been really asked by anyone or mentioned at any meetings.

Kind regards

Subject: Gel Blaster Question - Legality of Articles by

Good morning,

I note that _____ is registered to _____ can you
 please confirm if this is true?

Please do not use the Email address Weapons.PRAD@police.qld.gov.au to send enquiries to Weapons Licensing. If you send an Email to Weapons.PRAD@police.qld.gov.au you will NOT receive a response. General enquiries are to be sent to weaponslicensing@police.qld.gov.au and **NO** other Email address. I have provided some information that will assist you in when making B709 Applications please read this information carefully as this information will help expediate your applications.

- The Weapons Team have identified some issues with applications which cause delays with them progressed. By following the recommendations your application will be progressed quicker.
- Apply online and save time.
- An application is **NOT** required for Gel Blaster parts or accessories.
- If you do **NOT** provide the Quantity, Make, Model and specify the items are Gel Blasters your entire application will be rejected and you will have to lodge another one.
Example: 100 x Make - Kublai Model - K2 MK18 - Gel Blasters
- Do **NOT** abbreviate the Makes and Models, provide the full details.
- Do **NOT** send the same Email to multiple accounts – all enquiries should be sent to weaponslicensing@police.qld.gov.au
- Do **NOT** apply for multiple applications if it is unlikely this will be utilised for a shipment. Applying “just in case” slows down assessment of everyone’s applications.
- You **MUST** have an approved B709 prior to importing the item.
- Weapons Licensing will **NOT** consider fast tracking an application due to a shipment having arrived in Australia prior to a B709 being approved. Fast Tracking is only approved under extraordinary circumstances. Justification needs to be made as to why your application should be processed before others.
- An issued B709 cannot be amended, reissued or extended; you will be required to lodge again if mistakes have been made.
- If more than five different types of Gel Blasters are being applied for, it is requested you provide an attached list of all the item(s) being imported (in Microsoft Word or Excel Format),
- Type in the section list below the full details of the item(s) you wish to import on the application. See attached list of Gel Blasters” and
- Upload this list in the Supporting Documentation section, when lodging the application online.
- A suggested format for Gel Blasters is below:

| Quantity | Make | Model | Item Type |
|----------------|-----------|-----------------|-------------|
| 100 | Kublai | K2 MK18 | Gel Blaster |
| 100 | SKD | Glock 18 Pistol | Gel Blaster |
| 100 | JinMing | ACR J10 | Gel Blaster |
| 100 | Hanke | M97 | Gel Blaster |
| 100 | ZeHua | M82A1 | Gel Blaster |
| 100 | Gangjiang | M24 | Gel Blaster |
| Total = 600 | | | |

– A suggested format for Firearms is below:

- One firearm per line due to unique serial number required.

| No. | Category | Make | Model | Calibre | Action | Serial No. | M |
|-----|----------|------|-------|---------|--------|------------|---|
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |

The final determination whether to allow the importation of any item(s) rests with Australian Border Force. Enquiries can be made via s. 47E(d)

To answer your question directly about Gel Blaster parts, Weapons Licensing does **NOT** make a determination on Gel Blaster parts that is up to the ABF, this point has been reiterated to the Gel Blaster community on multiple occasions and is also mentioned on the Weapons Licensing Internet page. Please familiarise yourself with information relating to your question prior to contacting Weapons Licensing. You do **NOT** need a B709 for Gel Blaster parts, please see the below Email from ABF dated 26th of August 2020.

This Email will be retained should it be needed for future referencing.

 Subject: B709 for Gel Blasters Parts [SEC=OFFICIAL]

OFFICIAL

s. 47B(a), s. 47F

Gel blaster parts do not require import permission. B709A is not required. However, if the Gel Blaster parts are parts made for air soft firearms or are compatible with air soft or real firearms (and these are what appear to be popular for upgrading Gel Blasters), then they will require import permission.

ABF have been seizing a lot of Gel Blaster Parts because they were manufactured for Air Soft firearms.

Subject: Legality of articles

To whom it may concern

For my piece of mind and security of my business, I would like to enquirer about the legality of the products I own and sell. Are you able to confirm a licence or authorization to possess the following articles, is not required under the law, in the State of Queensland.

These parts are replacements or upgrade parts for gel blasters.

- Plastic or metal gears
- Metal anti-reverse latch
- Plastic or metal Pinion gear
- Short and long shaft 460 and 480 motors
- Nylon or plastic tappet plate
- Plastic or metal Cylinder head
- Plastic or metal Cylinder head nozzle
- Nylon piston with metal rack
- Springs
- Plastic or metal Cylinders
- Metal and/or plastic HPA engines
- Nylon and metal gearboxes
- Nylon and metal receivers
- Nylon, metal or plastic and triggers
- Plastic or metal barrel t piece
- Plastic or metal spring guide

Released by the Department of Home Affairs
under the Freedom of Information Act 1982

- Electrical mosfet
- Plastic or metal barrel
- Plastic or metal piston head
- Plastic or metal magazine catch
- Plastic trolley switch
- O rings

These parts may include multiple brands, Jinming, Retroarms, Lehui, SHS, Golden Eagle, Infinity, Jing Jang, Lonex, Huang sing, CYMA, Kublai, Polarstar, Jong Jing, Boax Juang, just to name a few.

Could QPS please confirm these products are completely legal to sell and own in Queensland? For all intents and purposes, I am only purely querying QPS stance, on if a licence or authorization is needed for the listed parts. Not the importation factor.

Regards,
