NOTES:

1. What is a percentile? A percentile is a measure used in statistics indicating the value below which a given percentage of observations in a group of observations falls.
2. Processing times for some visas are not available where the number of visa decisions is too few in a particular month to provide a reliable indicator of time. Where possible, the Department has started to apply a year to date (YTD) count of visa decisions, rather than monthly, in an attempt to provide an indicative view of the global processing time.
3. As data is drawn from a dynamic system environment, the information is correct at the time of clearance and figures may differ slightly from previous or future reporting.

Caveats:

1. Partner visa applications involve a two stage process, and the two applications must be lodged together. That is, the offshore Partner (Provisional) (subclass 309) visa is lodged with the Partner (Migrant) (subclass 100) visa. The two applications are counted separately, and in the majority of cases decided at different times.
2. Cases lodged and recorded in the system as on-hand at a specific processing location may be processed at any location under global caseload management.
