Caveats:

1. Partner visa applications involve a two stage process, and the two applications must be lodged together. That is, the offshore Partner (Provisional) (subclass 309) visa is lodged with the Partner (Migrant) (subclass 100) visa. The two applications are counted separately, and in the majority of cases decided at different times.
2. Cases lodged and recorded in the system as on-hand at a specific processing location may be processed at any location under global caseload management. Where cases have been transferred between processing offices, there may be delays in the new processing location being reflected in Departmental reporting systems.
3. As data is drawn from a dynamic system environment, the information is correct at the time of clearance and figures may differ slightly from previous or future reporting.

Caveats:

1. Partner visa applications involve a two stage process, and the two applications must be lodged together. That is, the offshore Partner (Provisional) (subclass 309) visa is lodged with the Partner (Migrant) (subclass 100) visa. The two applications are counted separately, and in the majority of cases decided at different times.
2. As data is drawn from a dynamic system environment, the information is correct at the time of clearance and figures may differ slightly from previous or future reporting.
3. Finalised includes all subclass 309 and 100 visas granted, refused and withdrawn
4. Regarding Immigration data, the Department's current policy is to mask numbers which are less than five as <5, noting we are reviewing the confidentiality method for the future.
