Hello

I have read through your proposed bill and I am totally AGAINST this. I am all for government doing its part to keep people safe but this is a step too far. By forcing companies whose business it is to keep hackers out of our information you will without a doubt reduce my privacy and the privacy of millions by allowing hackers to do what they know best and that is get to our information. How can you possibly say that it will be ok and that one of your own people won't sell the ability to gain access to the highest bidder or be hacked yourself or worse still allow other foreign governments to have access, You can't... The government of this country is supposed to be protecting its people and not putting them in harm's way which is exactly what this bill will do. We have judges for a reason. Do not do this!

Kind regards

Adam H
