The proposed bill will achieve little and risk a lot

Serious criminals will easily avoid the big organisations encryption methods and use independent methods.

Meanwhile the creation of encryption back doors will leave the public exposed to inevitable data breaches and sacrifice the ever increasing value of citizens digital information.

Its a cliché, but is true

"Those who would give up essential Liberty, to purchase a little temporary Safety, **deserve neither** Liberty nor Safety."

please keep my name and address anonymous

thanks Regards
