**Date:** Friday, 7 September 2018 12:08:08 PM

---

I object to this legislation. There is no such thing as a secure backdoor, it sets a frightening precedent for privacy (slippery slope), and makes applications and services less secure. It's not just governments trying to get access, it's bad actors (hackers, foreign intelligence, provider employees, etc). It's a terrible proposal for very simple reasons.
