Hello,

Please stop this bill.

The provisions will severely undermine the privacy and therefore freedom of our citizenry.

This Orwellian perspective that we need to undermine our right to private communication in order to assist in capture of terrorists, child molesters and other criminals is unjustified. We rank 201 out of 219 countries by murder rate. We have extremely low crime rates. It seems to be thanks to people being above the poverty line and an excellent police force.

Let's prevent further erosion of our online protections and stop this bill.

Regards,
Cameron Chong
