---

To whom it may concern,

The proposed assistance and access bill 2018 would leave the Australian public vulnerable to hackers.

Were hackers to make false technical assistance notices to companies, these companies may leak Australian information to outside actors, such as China or Russia.

Furthermore, politician's data would equally be at risk due to this, a political opponent could take and use private information to take political sovereignty for elected officials.

Thank you for your time,  
Jack Swain
