Hi,

Please stop this bill. The provisions will severely undermine the privacy, and therefore, freedom of our country and it's citizens.

The perspective that we need to undermine the right to private communication in order to assist in the capture of terrorists, child molesters, and other criminals is unjustified. We have extremely low comparative crime rates that would be better lowered by looking at incarceration trends and focusing on fixing problems at a social level.

Let's stop the further erosion of our online protections and stop this bill.

Regards,
Johnathon Foley
