Hi

I'm a senior tech, waaay up the ladder in the telco industry. Tech skills got me here, not politics. You have poor advice, technologically poor advice.

Firstly, you have an implementation problem. Implementation is unfeasible.

Secondly, you're creating a known exploit, which is just dumb. Low intelligence moronic.

If ever there was a demonstration of how incompetent and incapable our politicians and bureaucrats are of making policy that looks after the citizenry, this is it. Please hold an election soon.

Regards,
Nathan Clark
