Subject: Objecting to the "Telecommunications and Other Legislation Amendment (Assistance and Access) Bill 2018"
Date: Friday, 17 August 2018 2:38:42 PM

Hello,

I feel it is my duty as an Australian Citizen to object to the "*Telecommunications and Other Legislation Amendment (Assistance and Access) Bill 2018*".

I feel the whole thing is completely unnecessary and fail to see why the Australian public should be subjected to this. Some of my main points of concern

- Providers can be required to install, maintain, test, or use software that a law-enforcement or intelligence agency has given them
- Providers can also be made to substitute a service they provide with a different service
- A ten year jail term for refusing to unlock a device

I feel these powers constitute a severe breach of my personal privacy and liberty. It saddens me that these laws are even suggested in our great country.

I hope you reconsider,
Simeon
