**Subject:** SCT

Australian government should increase massively significant cost threshold to more than 180,000\$ over the ten years . There should be no discrimination on the basis of health and disability . Canada and NZ have SCT more than 150,000 and 270,000\$ over the ten years much more as compared to Australia . Government should seriously think about this issue and make sure every one get P.R those have fulfilled the requirements . No one should be rejected on the basis of health and disability . Australian government should change these laws.
