

Australia's 2020 Cyber Security Strategy - Submission

I'll keep this short.

No government mandated approach to online security can possibly address the plethora of individual use cases that continue to expand as online activities evolve. Broad restrictions are more likely to impede commerce and harm individual freedom than protect users. For that reason, it is important that Parliament does not restrict the individual's right to use

- Encryption
- VPNs
- Virtual Machines
- Online anonymity

Each of the above is an important tool that can be used to protect the individual online.
